

SOME SUCCESS ADVICES

For everyone

KABEYA CIEPELA Winner

LEARN ENGLISH BY ENTREPRENEURSHIP

INTRODUCTION AND STORY

I was eighteen years old when I began to write books about success, motivation, and self-control.

So; before that, one day I stand alone and began to look at the billionaires of the world; certain among them look so young, maybe they are old then me, but I knew that if a man like Zuckerberg who is 41 years old handle an enterprise like Facebook, it means that he worked on it many years ago; for, Facebook has been made on 4 February 2004.

After that, I began to do some searches about how to become rich, a bit like a millionaire;

I can notify that I got many kind of adages, ideas, discipline courses, concentration mindset, and so on.

So, all of that put butterflies in my belly; I got a lot of motivation, so enough for planning a mountain.

So I have taken a break and I thought: How can I make one thousand dollars now or at least nowadays.

So I began to search on YouTube, and I saw a video that was speaking about “gaining 1000 dollars in one month in posting videos on YouTube.

After seeing that I was so excited to work on it.

I was like: I’ll do it, and I’ll gain that 1000 dollars and pushing myself forward.

I began to work so hard for reaching that; so I didn't realize that for monetizing a YouTube channel, it's obligated to reach subscriptions and 90 hours of visioning on YouTube for the first three months; So that information switched me off a bit, but I continued to work on it.

In that time I was studying at the INBTP it's the national institute of building and civil engineering; I was in preparatory; so I put a little break on the affair "YouTube channel", because I had to study a lot and I had many others businesses that I started; I was really determined to become rich.

But, I had a problem that many of our team have (*The team of the ones who*

look for success); the problem was that I would reach all my little targets in a few time, until I realized that it was almost impossible to do all those things in the same time; so, I taken a long break for almost 2 months

AdviceN°1

So I want to tell you something;

When you want to reach something and you think that working on many fronts will propel you so far forward, you are wrong; and when you will realize that all things don't arrive to the fulfillment at the time that you want, you will be broken like many ones of our team.

So, the best thing to do is:

Even if you have many goals or targets, it is better to work on those one by one

or one after another; and when you choose to mind yourself on one goal, you must work on it step by step; not quickly, but slowly, surely and precisely.

Don't compare yourself to others, for, you can be the best version of yourself.

The continuation of the story

So after taking a long break for almost two months, I finished my academic year; and I realized that with the last YouTube channel I couldn't continue to work on it, because of the time;

So I made a new YouTube channel;

I thought I was in good posture, because that I was in vacation; so the main topic of my YouTube channel

was “*learn English with entrepreneurship*”.

So I began to work on that, and one day I published my first video, I thought that it will have around one thousands of views, or something like that, but it wasn't the k case, I was deceit, and I realized that I was wrong in my thoughts.

Advice N°2

Scientifics has proved that, the fastest way to go from a point A to a point B, is not a straight one, but a curved one, like you can see in this image.

So, don't think that all things will work well when you work on a goal.

Many things can go wrong but I can contribute to boost you toward the goal.

The continuation of the story

And I realized that I done a mistake in thinking like that, for, my first video had no views; yeah, no views.

So, I said to myself, *let me wait for a while, maybe, something can happen*; I waited one day, two days, and I checked again, it was the same thing; no views; but I said to myself that: *the video that I sent has good contents that pleased myself* ;

And then I realized that the thing that please me, is not strongly the one that please others.

Advice N°3

Don't think that the one that pleases you, please also others; for, it is almost impossible to satisfy or to please everyone.

So, if it is almost impossible to please everyone around ourselves, what about everyone around the world?

The continuation of the story

And, after the deception, of the first video, I posted a second one, in having the hope that, I could have other results (at least different then the first one);

So, I applied something that Einstein said.

Advice N°4

Einstein (14 March 1879 – 18 April 1955) said once:

***“It is foolishness,
doing the same things,
and waiting for
another results type”***

And it is true.

It is good to be focus on one goal with a high level of mentality until the point where even when you fall 10 times, you stand up 10 times, and keep working; but, if you fall 10 times in the same place, think about to change the way of reaching your goal; for, there is many ways those leads to that same goal.

The continuation of the story

So, for practicing the one that Einstein said, I taken another approach of publishing in my YouTube channel;

I began to post short videos; after posting my first short video, I had two views after some hours; it wasn't wonderful, but not bad either for me; then I posted a second one that had also two views; my third one had nine views; and then I posted the fourth; my fourth one had one hundred views, and I was so happy.

And one day I posted a video, and I said let me check a bit my YouTube channel earn;

When I checked it, there was an information in that menu that said, the video monetization, is not available in your country;

After reading that, I was broken out, And I said, in myself, why didn't I check it before?

I was knocked out; but I tried to change my YouTube channel location;

But, unsuccessfully, I couldn't change my YouTube channel location.

I finally realized that I wasn't able to make money by YouTube; finally without option like publicity or others.

Advice

This is someone's story, but not yours;

It' is someone's situation, but maybe not yours.

When you have a goal, you must eliminate all things that is not taking the same way then your goal.

Don't think that all ones who succeed today, had all yesterday; no.

When we begin a business, a goal, or a work, we start it with a little weakness, but it doesn't means that the end will be the same.

It is like a baby ; when he is born, he is strength less, innocent, sweet, and weak, but after some times he becomes a war machine working for The army, a strong entrepreneur

reaching each one of his goals, a good teacher teaching with strength and kindness, or again a president working for general interest.

All that we do, take time for becoming grand or great according the one who does it.

THE SUCCESS KEYS

Generally, everyone hasn't the same thoughts; but according to my observation, there is two mains success keys;

The first one is:

Working intelligently

The second one is:

Good time managing

I. Working intelligently

Many ones thinks that working hard is good; Even me, I think also, but in working hard, you reach just a part of the goal, and the tricky thing about working hard is that we waste time.

Let us give a simple example of that;

Someone tells you:

Count these desks;

- When you work hard:
You will count desks one by one
- When you work intelligently: You will count desks which are in the length and in the larger, and after, you will multiply these, you will find the

same results, with the first one, but you will gain the time.

However, NIKOLA TESLA (10 July 1856 - 7 January 1943) has once said:

“THOMAS EDDISON is a type of man who will look for a needle between a straw-heap in observing with full care each one of straws until he will find the needle, instead of using some tricks for finding it up’

, we can directly understand that THOMAS EDDISON worked hard, and NIKOLA TESLA worked intelligently. However, both are intelligent; the thing is just that, one of them gains time and another wastes it.

2. Good time managing

Working intelligently, helps to gain a lot of time that we can use in many others ways, but managing time it is another kind of topics;

Using your full time in working is good but, not better;

Using your full time in playing for example, is good but not better;

The best way of using your time is to section it into many parts like:

In 24 hours you can use 2 hours for church, 8 hours for working, 2 hours for taking a rest, 2 hours for reading and discovering, 2 hours for the family, and 8 hours for sleeping. (it is just an example)

So managing time is one of the great success key;

For; you, me, and ELON MUSK, all of us have 24 hours in a day; So why ELON MUSK is richer than us?

Just because he understood all these things.

SUCCESS ENEMIES

You know that it is possible to succeed in life, but before succeeding, you must also know that there is one man and one thing who fight against success, that you have to win for succeeding; like:

- Yourself
- Procrastination

The tricky thing about success is that it pushes you to do things that yourself decline.

Therefore you must have discipline and a strong mindset.

YOURSELF

When I speak about yourself, I speak about all your habits that can

constitute a Dom, against your success;

Habits like: watching TV instead of reading, going to the party instead of studying, or sleeping instead of walking and discovering things and so on. So, all those habits must be won for succeeding in life.

PROCRASTINATION

The procrastination is the one of the greatest enemy of the one who want to succeed in life or precisely in certain domains.

Most of the time, procrastination pushes you to postpone a work, or something that might be done today for example. Not because you are fatigued, but because you feel lazy.

CONFUCIUS has once said: “***If you want to do something, you will find a way for doing it, whatever the situation, whenever the time***’

In summary, discipline and self-control, can help you to fight and to win against yourself and procrastination.

CONCLUSION

Thinking, or reading about success is good; but to put yourself into the action, is better; avoiding procrastination and doing right things in the right time will boost you forward, toward success.

Advice N°5

All that is written here is good but it will be better if you take the decision to put

*it in practice; for, yourself can Change
your life; no one else.*
